ColorDx is the military-grade, color vision diagnostic application designed by Dr. Terrace Waggoner and validated by the Naval Aerospace Medical Institute (NAM). Additionally, the FAA has recommended its use for general aviation, pilot flight physicals and includes tests for protan, deutan, and tritan deficiencies. Now including the premier pediatric test, Color Vision Testing Made Easy™, there is no finer solution for color vision assessment.

Features
- Validated by DoD vision researchers
- Diagnostic: quantitative and qualitative
- Self-administered and self-scoring
- Standard (literate) and Pediatric (illiterate) tests
- Symbols for any language
- Fun to use, easy to administer
- Cross platform versions: Android, iOS, Windows, Mac
